### **DETAILED ACTION**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Schrader.

Schrader discloses in figures 1-8 a safety seat that anticipates an emergency support system comprising a solid structure formed by a vehicle seat 1, having at least three slits (6 on both side of the shell and the slit of 5 in the back of the shell), at least two safety belts (7 and 30) and fittings 5 on the belts.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Schrader in view of Molski, along with Al-Temen, as set forth in the previous office action.

### ***Response to Arguments***

Applicant's arguments filed December 6, 2004 have been fully considered but they are not persuasive. Applicant argues that Schrader does not having fittings

capable of being fixed to a seat shell. However, the limitation "fittings" is so broad that reference number (5) can be interpreted as a fitting. They are capable of fixing the belts to the shell. The belt 30 recites that it is fixed and the slit holds the belt in place.

Applicant argues that the belts in Schrader don't have a fixation point. However, Applicant didn't positively claim a fixation point. Applicant simply claimed that it is possible to connect the belts to a fixation point. However, any belt is capable of being fixed to a fixation point. Applicant argues that belts 33 are not safety belts. However, the examiner has provided safety belts (7 and 30) which are lap and shoulder belts. Applicant argues that 20 is not rejected since claim 18 should be allowed over the prior art. However, claim 20 is finally rejected by Schrader in view of Molski, along with Al-Temen.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
